Re: Bacteriological Water Analysis on Group Water Scheme

I enclose result of bacteriological sample taken on 12th June, 2000.

The presence of E. Coli in the bacteriological sample indicates faecal contamination, and renders the water unfit for drinking according to the Drinking Water Regulations 1988. It is necessary to boil the water before use, washing salads etc. as discussed by telephone.

Please advise all members currently on the scheme of same.

If you have any further queries please contact me at 078 50316 between 9.30 & 10.30 am Monday to Friday.

Yours sincerely

Alan Lavin
Environmental Health Officer
